Chairperson's Message

SYED SULTAN AHMED

International education in India is at an inflection point. The question is no longer access, it is relevance.

Over the past two decades, I have seen both the promise and the gaps: schools aspiring to global standards, yet often operating without the systems and support required to sustain them. TAISI was built to address this.

Our vision is clear: to build a connected, credible, and forward-looking international school ecosystem in India. Our mission is focused: to strengthen school systems through access to global practices, educator capability, and platforms that translate insight into action.

This is not about adopting international frameworks in form, but embedding them in practice. What matters now is not what schools claim to offer, but what students are truly prepared for.

TAISI will continue to serve as a platform for perspective, partnership, and progress, bringing together a community committed to raising the standard of international education in India.
